Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 13 February 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION***Election/Restrictions***

1. Applicant's election with traverse of Group A (i.e. including generic claims: claims 1-13, 17-43, and 63-68)¹ in the reply filed on 2/13/07 is acknowledged. The traversal is on the grounds that there is no support for the contention that Species A and B having different characteristics. However, put in another way, the species are different since one includes a product with added water and the other teaches away from same (by having a product which is free of water addition). Clearly, the step of adding water as opposed to avoiding same provides a different product as one would comprise less water than the other. For example, the product having added water would likely require the addition of an emulsifier to provide a more uniform product which is similar to that of the product having no water.

Nevertheless, upon a second review of the instant claims, and, in particular, the elected instant claims, additional species were discovered. Species A (and generic claims therein) are directed further to the following patentably distinct species:

Ai: An egg product comprising the addition of a cooked thickener (claims 4-6, and 22-34).

Aii: An egg product comprising the addition of a starch material (claims 7, 8).

The species are independent or distinct because they relate to the method of providing starch which has not been cooked and has a different consistency than a cooked thickener.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally

¹ Applicant's argument that claim 23 pertains to neither the embodiment where water is added nor the embodiment which is free of water or having only incidental water. As a result, claim 23 is considered one of the generic claims with respect to the species set forth in the original Restriction Requirement.

Art Unit: 1761

held to be allowable. Currently, claims 1-3, 9-13, 17-21, 35-43, and 53-68 of Group A are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
